## **Draft Planning Design Code**

We have yet to meet one person who fully understands this planning and design code, and what we are now seeing as urban infill will not only destroy all our suburbs, but will make living in these areas much more difficult. Will the infrastructure, public transport, schools, hospitals and climate survive the onslaught. The plan as we can see does not value the history of our town and is on its way to destroy it. A deadline of 28<sup>th</sup> of February for the online community feedback on this draft code needs to be extended since the draft code is not available online, it apparently is to some extent incomprehensible, and hundreds of pages long. It would be logical that a requirement for a feedback online is required that the draft code (including any inconsistencies etc.) would be available also on line. The community feedback can only be seriously be considered by the Government if the community is fully informed of what the Government intend by this code. The deadline must be extended until the code has been completed in full and made available to the public giving them time for a considered feedback. Also if the government of all political persuasions wants to maintain the trust of the people it must be fully open to the people and resist accepting political donations to political parties for tacit favours; it is destroying our democracy.

Yours truly,

Elizabeth and Brian Floreani.
