The State government has out for comment a frightening document called “Draft Planning and Design Code for South Australia”.

The maps indicate that parts of, or all, of many National Parks, Conservation Parks, ForestrySA Native Forest Reserves, Sanctuaries, and Heritage Agreements are to be rezoned “RURAL”.

This, in a state that is already haemorrhaging ecosystems and good quality native vegetation so that many habitats and species of plants and animals are destined to extinction.

I implore you to protect National Park and Wildlife National Parks, Conservation Parks, Recreation Parks, Heritage Agreements, ForestrySA Native Vegetation Reserves, Sanctuaries and other public land with native vegetation from being rezoned Rural.

The maps therein indicate that parts of, or all, of many National Parks, Conservation Parks, ForestrySA Native Forest Reserves, Sanctuaries, and Heritage Agreements are to be rezoned “RURAL”

This is absolutely irresponsible legislative change. If anything, our diminishing native veg needs MORE protection, not less. As governors and custodians of our state, you have a responsibility to ensure less loss of diversity, not more. These zoning changes threaten the historical and current good works of thousands of Australians who have struggled to fight species extinction and native vegetation/habitat loss.

It is almost incomprehensible that In a state that is already losing ecosystems and good quality native vegetation Anyone could even consider the reckless and damaging zoning changes proposed.

I request, as a concerned South Australian, that you protect National Park and Wildlife National Parks, Conservation Parks, Recreation Parks, Heritage Agreements, ForestrySA Native Vegetation Reserves, Sanctuaries and other public land with native vegetation from being rezoned Rural.
