Dear Minister

Thank you for the decision to delay implementation of the new Planning and Design Code.

We are hopeful that this delay will facilitate further community consultation and, in particular, the opportunity to comment on the final draft.

We believe that the groundswell of community concern will cause material alteration to the current published draft, such that the new iteration will be so vastly different as to require a second round of community input.

Failure to provide this would be an abrogation of the Government's responsibility to consult. The new document should start the entire process again as it should be so different that it would be fair to argue that it had not been subject to any consultation.

Best Regards
Geoff and Margaret Campbell
