To whom it may concern,

Please find attached my submission in reply to the draft planning and design code.

In addition, as a long term resident in Adelaide's beautiful green leafy eastern suburbs, I am most passionate that the unique beauty of this residential area of Adelaide is maintained for future generations. The draft planning reform has not put the greening of Adelaide as a priority. With our recent disasterous fire season, recognition of the value of trees and green space in retarding global warming should now be glaringly obvious. All planning reforms must heed this warning. I am happy to provide any further information as required.

Regards, Catherine Cocciolone
