HISTORIC CONSERVATION ZONES and CONTRIBUTORY ITEMS

I strongly exhort the State Government to leave these in place.

In addition, blocks of land abutting them must also have height and density limits, preferable one storey but no more than two, and preferably one dwelling but no more than two, to avoid overlooking and all the horrible and well documented consequences of increased numbers of people and vehicles.

The proposal to remove these protections is abhorrent and will be the ruination of our suburbs, character and lifestyle.
