Q14 Please enter your general feedback here

It is important to retain canopy cover and stop the extreme clearing of vegetation from proposed redeveloped housing blocks. Vegetation destruction increases temperature zones, destroys the ecosystem and helps add to pollution- this focus on subdivision for the sake of making money is detrimental to our future and our children's future!
Council members that represent the community and have the power to “pass” the housing plans with this type of destruction - need to have a background in ecological systems and environmental studies before they are “qualified” to condemn our vegetation to dust.

Q15 Do you have any attachments to upload?(pdf only)  Respondent skipped this question
