Q14 Please enter your general feedback here

I have no comments about the structure of the Code, my comments relate to the need to maintain existing environmental policy provisions (e.g. open space requirements, water sensitive urban design, the mandatory use of rainwater tanks/retention systems (above Building Code requirements) and to ensure that proposed policy improvements such a deep soil zones and trees requirements are maintained in the final version of the Code.

I feel that these important policies are essential components of liveable and climate resilient cities and that there is a need clear and mandatory planning policy to ensure that the balance of green cover and infill is sustainable.
