To Whom it May Concern

SUBMISSION ON PLANNING & DESIGN CODE - PHASE 3 – City of Burnside

In response to the draft Planning and Design Code – Phase 3, which is currently out for public consultation, I wish to register my strong objections to a number of issues as summarised below.

1. General Neighbourhood Zone and Housing Diversity Zone:

The draft Code places some areas of the City of Burnside’s in the General Neighbourhood Zone and the Housing Diversity Zone. The policy in these new zones is at odds with current zone policy and allows for a greater intensity of development than existing. The current zones focus on preserving character rather than accommodating change and infill and do not envisage a greater range and intensity of development than currently exists. I request that you move all residential areas to the Suburban Neighbourhood Zone with TNVs to match existing conditions.

2. All Existing Residential Areas

   a) Non-Residential land use: Currently in our council’s residential areas, shops, offices and educational establishments are non-complying. In the new Code existing residential areas will allow these non-residential uses which will adversely impact traffic, parking, noise, neighbour’s amenity and the character of our suburbs. This is unacceptable. All uses which are currently non-complying in our residential areas (eg. office and shop) should be “restricted development”. Alternatively, a new zone should be created purely for residential land use.

   b) Siting and Setbacks: Under the Code, building setbacks from side and rear boundaries will noticeably decrease, particularly at upper levels. This is unacceptable and will severely impact amenity and privacy. Existing sitting, setback and floor area criteria should be maintained throughout all our residential areas.

   c) Density and Allotment Sizes: The draft Code contains a number of errors and omissions. It is important that current minimum allotment sizes, heights and frontage widths match existing.

3. Historic Area Overlay

The lack of identification of Contributory Items in the Code, by either a map or list of addresses, will create uncertainty and confusion for owners, neighbours and prospective buyers. Existing protections and identification of Contributory Items should be maintained.
4. Commercial Centres

The Code places large scale centres in the same zone as small local shops, allowing large scale development and more intensive land uses throughout all these areas. This is inappropriate. A hierarchy of centres should be maintained. Additional zone(s) are needed to cater for the lower intensity local centres, particularly in older established areas.

5. Public Notification

The Code should reflect our council’s current Development Plan policy with respect to the notification of neighbours and the public. The Code should include notification for all development that increases development intensity, including additional dwellings on the site, two storey development, earthworks where new dwelling is located 600mm above ground level, and change of use from residential to non-residential.

6. Impact on Infrastructure and Essential Services

The potential rate and intensity of new development which will be facilitated through the proposed Code policies, could place existing local infrastructure, especially roads and stormwater systems under stress, particularly in our older established areas.

Traffic density is already concerning around our narrower streets and the proposal to further increase population density will inevitably worsen this and risk the passage of ambulances and essential services.

Schools in the area are already under stress, to the extent that enrolments are denied to local children.

7. Tree Canopy and Climate Resilience

The 30-Year Plan for Greater Adelaide calls for an increase in tree canopy cover, however, the draft Code works directly against this by enabling larger developments and the increased removal of trees on both private and public land. This will result in a significant reduction in canopy cover, habitat loss and climate resilience, due the increased infill development opportunities, reduction in minimum site areas, site coverage, setbacks and increased number of street crossovers.

Unless the above issues are addressed and the draft Code is amended to reflect these concerns, there will be an unacceptable loss of local character and amenity in my neighbourhood.

I trust that the concerns detailed above will be given your full consideration.

Yours sincerely

Pauline Crawford

SUBMISSION ON PLANNING & DESIGN CODE - PHASE 3 – City of Burnside

In response to the draft Planning and Design Code – Phase 3, which is currently out for public consultation, I wish to register my strong objections to a number of issues as summarised below.

1. **General Neighbourhood Zone and Housing Diversity Zone:**

   The draft Code places some areas of the City of Burnside’s in the General Neighbourhood Zone and the Housing Diversity Zone. The policy in these new zones is at odds with current zone policy and allows for a greater intensity of development than existing. The current zones focus on preserving character rather than accommodating change and infill and do not envisage a greater range and intensity of development than currently exists. I request that you move all residential areas to the Suburban Neighbourhood Zone with TNVs to match existing conditions.

2. **All Existing Residential Areas**

   a) **Non-Residential land use:** Currently in our council’s residential areas, shops, offices and educational establishments are non-complying. In the new Code existing residential areas will allow these non-residential uses which will adversely impact traffic, parking, noise, neighbour’s amenity and the character of our suburbs. This is unacceptable. All uses which are currently non-complying in our residential areas (eg. office and shop) should be “restricted development”. Alternatively, a new zone should be created purely for residential land use.

   b) **Siting and Setbacks:** Under the Code, building setbacks from side and rear boundaries will noticeably decrease, particularly at upper levels. This is unacceptable and will severely impact amenity and privacy. Existing siting, setback and floor area criteria should be maintained throughout all our residential areas.

   c) **Density and Allotment Sizes:** The draft Code contains a number of errors and omissions. It is important that current minimum allotment sizes, heights and frontage widths match existing.

3. **Historic Area Overlay**

   The lack of identification of Contributory Items in the Code, by either a map or list of addresses, will create uncertainty and confusion for owners, neighbours and prospective buyers. Existing protections and identification of Contributory Items should be maintained.
4. Commercial Centres

The Code places large scale centres in the same zone as small local shops, allowing large scale development and more intensive land uses throughout all these areas. This is inappropriate. A hierarchy of centres should be maintained. Additional zone(s) are needed to cater for the lower intensity local centres, particularly in older established areas.

5. Public Notification

The Code should reflect our council’s current Development Plan policy with respect to the notification of neighbours and the public. The Code should include notification for all development that increases development intensity, including additional dwellings on the site, two storey development, earthworks where new dwelling is located 600mm above ground level, and change of use from residential to non-residential.

6. Impact on Infrastructure and Essential Services

The potential rate and intensity of new development which will be facilitated through the proposed Code policies, could place existing local infrastructure, especially roads and stormwater systems under stress, particularly in our older established areas.

Traffic density is already concerning around our narrower streets and the proposal to further increase population density will inevitably worsen this and risk the passage of ambulances and essential services.

Schools in the area are already under stress, to the extent that enrolments are denied to local children.

7. Tree Canopy and Climate Resilience

The 30-Year Plan for Greater Adelaide calls for an increase in tree canopy cover, however, the draft Code works directly against this by enabling larger developments and the increased removal of trees on both private and public land. This will result in a significant reduction in canopy cover, habitat loss and climate resilience, due the increased infill development opportunities, reduction in minimum site areas, site coverage, setbacks and increased number of street crossovers.

Unless the above issues are addressed and the draft Code is amended to reflect these concerns, there will be an unacceptable loss of local character and amenity in my neighbourhood. And I will be forced to reconsider my vote.

I trust that the concerns detailed above will be given your full consideration.
