Q14 Please enter your general feedback here

I have a Certificate in Fire Technology, Cert 2 in Horticulture, have had more than 30 years as an emergency service volunteer (CFS & SES) i have for many years been advocating buffer zones of fire retardant plants between bush land and residential & commercial properties. We should have safe access & egress roads from danger zones such as bushfire prone areas or flood prone areas these roads should be marked as such similar to what japan does for its tsunami escape routes. We should ban places where there is only one access/egress route. We should encourage people to plant Fire Retardant species especially in high risk areas. All schools in bushfire prone areas should be fire safe buildings and the grounds should be safer refuge places. It may be worthwhile to build large underground water storage tanks for firefighting purposes and where possible there should be access to this supply by Helicopter pickup.
